A number of local Democrats have received copies of the speech on the tariff ers. With all of this the game was bill made by Congressman Abbott, and are studying it closely, as they expect to be called upon to tell why they believe as Dallas four. Goodenough's pitching was they do.

The contract to put in the sewers in the Third, Fifth and Sixth wards will be let on Monday. When this system is completed Fort Worth will have twentyfour miles of sewers.

#### SPLENDID CROPS.

Summary: Two base hits-Gelss. Three base hits-Surdsy. Strucg out-By Crothers, 5; by Goodenough, 2. Bases on balls-By Crothers, 1; by Goodenough, 1. Bit b, pitched bal-By rothers 1; by Goodenough, 1. Passed balls—By rothers 1; by Goodenough, 1. Passed balls—welch, 1; Kittle, 1. Double plays-Levis and Welch, 1; Kittle, 1. Double plays-Levis and 1; Kittle, 1. Double plays-Levis and 1; Kittle, 1; from a trip to Southern Texas, having visited Rockport, Aransas City, San Antonio, Victoria and other places. Colonei Smith says he never saw such bountiful crop prospects, and the good crops are general. He saw with his own eyes the growing wheat, oats, corn, millet and sorghum in over thirty counties, and conversed with those who brought news from counties as far as the R:o Grande The cotton prospects are also good and there is a large acreage. Colonel Smith says Texas will be more prosperous this year than ever before and that hundreds of farmers will be added to our population during the coming fall and winter. Cattle are all fat and horses are in fine condition.

Mrs. Judge R. E. Beckham is quite Nueces, Encinal, LaSalle, Webb and all the counties between Fort Worth and the C. M. Cady of Atlanta, Ga., is at the Ro G ande, and I can truly say I never saw such crops in my life. The farmers J. H. Gibson, Chicago, is at the nave planted corn, oats, wheat, millet, sorghum, Johnson grass and cotton. I saw oats that will make 125 to 140 bushels to the acre, corn 60 to 70 bushels to the acre, and in the lower counties corn is all to appear. made. Such vegetables, too, I never saw them equalled: there is an abundance for market after the home tables have been bountifully supplied. Grass was never flaer and cattle are fat. Of course all feel good, and when the marketing of the crops is under way business will take on great activity. I doubt if there is another state in the Union that will show the prosperity Texas will this year. The railroads will do a fine busi-ness. Understand that what I say about the character of the crops in the lower counties is equally true of Tarrant, Johnson, Hill, McLennar, Bell, Travis and the counties on either side of the Missouri

H. Specht of Wichita county has been over a considerable portion of Wichita and Wilbarger counties during the past week and came in last night. He says that grain of all kinds is doing splendidly. In a field of barley grown along Red river a man can stand upright and will be hidden from view. He has one field of wheat that reaches to his chin and oats that are up to his forehead. Wheat harvesting began yesterday and there is every reason to believe that thirty to thirty-five bushels of wheat to the acre will be the acreage. The estimated yield of oats per acre was placed by farmers who had tested it at 100 bushels, but Mr. Specht says seventy tive bushels will surely not be over the mark. The committee from Iowa who are looking over the Panhandle are greatly pleased with Wich-

its, Archer, and Wilbarger counties, and Mr Specht-thinks they will make a favor-able report on one of these counties. The Fort Worth and Denver is doing a great work in developing the country, says the gentleman, and prospectors from Vir-ginis, Iowa and L uislans are now in the country and will certainly bring immi-gration. Mr Spects leaves to-day w th his wife and family to spend three months on his great Wiehlta county farm. Texas is indeed prosperdus this year.

T. P. A. meeting at the Pickwick hotel, Saturday evening, June 2.

On June 2 and 3 the Texas and Pacific and Missouri Pacific Railways will sell account national Democratic convention, tickets good to return until Jane 18. Two daily through trails with sleepers via either body of a dead infant had been found route.

How Fort Worth Was Beater

Dallas, TEX , June 1 .- An error by Goodenough in the first inning, and three or four fatal and urjust decisions by the ampire, lost Fort Worth the game to-day oy a score of 4 to 8. Barring the errors of the first inning, which gave Dallas two runs, the Panthers put up a strong game. They outbatted Dallas from the beginning, and did better base running, and a look at the score will make a man wonder why the visitors did not carry off he game. A decision by Dennis in the eighth inning, permitting Bogarty to score when he was fairly put out at the home plate, and one in the Sunday-school piculcers and all piculc fifth declaring Joyce out at the fifth declaring Joyce out at the plate when he fairly scored settled the various sizes and shapes at low prices at made numerous others which were against that Port Westle Green Cole. both teams, much to the disgust of the entire audience as well as the ball playgood and he will prove a valuable aid. The Fort Worths are a much stronger team than at their last visit and there is no reason why they should not make improvement on the old record. Following is the official score:

who had lived probably a week. The body was greatly discolored with the exception of the negers of one hand which showed the child to be white. The box was secreted in a ravine on the Twombly pasture. Justice Smith was notified and proceeding to the spot viewed the remains and made some inquiries. All that was learned was that a week ago a wo-man had been seen walking in the direc-tion of the spot where the body was found. It cannot be said as yet whether

violence was used or not. County Attorn y Carlock was notified yesterday evening, and the case will be avestigated by him and Justice Smith and heart to protrude.

The old Hindoo art of uniting different metals by carting has been successfully revived in a Boston foundry, where steel and bronze are the metals dealt with.

Dr. Frank M. Mullime. opposite postoffice Those portions of the finished article which are to be of bronze are first cast, and after cooling are removed from the mold and the surface thoroughly cleaned fest from all traces of oxide or other impusi-ties. These pieces are then placed in a daily

mold having a form corresponding to that of the finished article, and the vacant spaces are then filled with molten steel, which thoroughly unites with the bronze wherever it comes in contact with it.

Is proposed to use this process in the production of fire-arms, with an inner line of browze and an outer jacket of steel, but the prospects of a useful arm being produced in this way do not appear very flattering -[Engineering.
